NOTAS EXPLICATIVAS

INDICAÇÃO PRELIMINAR

As estatísticas anuais do comércio exterior do Brasil veem sendo divulgadas desde vários anos através de duas séries de publicações: a dos **boletins resumos** e a dos **boletins gerais.**

Como dados principais dos **boletins resumos** aparecidos, o último dos quais referente aos anos de 1935 e 1936, teem sempre figurado:

a) as quantidades e os valores correspondentes a **todas as mercadorias** importadas ou exportadas no último biênio, segundo as especificações do quadro de classificação adotado, sem indicação, porém, das procedências, nem dos destinos;

b) as quantidades e os valores correspondentes às **principais mercadorias** de cada uma das duas correntes do intercâmbio durante o último quinquênio, com a indicação, para as importadas, do país de procedência e do pôrto nacional de entrada; para as exportadas, do país de destino e do pôrto brasileiro de embarque ou, em qualquer dos dois casos, o ponto de fronteira atravessado pela mercadoria ao ingressar ou sair;

c) as quantidades e os valores globais de cada uma das duas correntes, no último quinquênio, discriminados por procedências e destinos.

Os **boletins gerais** teem se distinguido, sobretudo, pelo fato de consignarem as procedências e os destinos de **todas as mercadorias** importadas ou exportadas no período de um quinquênio, completando, nesse particular, as informações parciais encontradas nos boletins resumo.

À série dos **boletins gerais** pertence a presente publicação que, contendo os algarismos referentes ao quinquênio 1933-1937, será o último de tal gênero, pois os boletins anuais, a partir do relativo ao ano de 1938, passarão a obedecer a um único tipo, que incluirá, em conjunto, todos os dados das duas séries de publicações mencionadas, mas abrangendo apenas o periodo de um biénio.

IMPORTAÇÃO

Sob a designação de importação compreende este boletim, exclusivamente, as mercadorias de origem estrangeira, introduzidas para consumo no Brasil, referindo-se os dados dos respectivos quadros e tabelas à importação geral, que engloba tanto as mercadorias já entregues ao consumo, como as ainda armazenadas nas alfândegas para esse fim, ou para serem reembarcadas com destino a outro pôrto do território nacional, sem incluir, entretanto, as que se acham apenas em trânsito para outros países.

As quantidades, os valores, as procedências e os destinos das mercadorias importadas consignados nesta publicação são resultantes das declarações prestadas nas faturas consulares, que constituem o instrumento de coleta pelo qual é elaborada a estatística da importação no Brasil.

Quantidade – As quantidades expressas em quilos representam o pêso líquido real das mercadorias, separadas de seus envoltórios, tanto externos, como internos.

Valor – O valor das mercadorias importadas, consignado nos quadros, é o valor livre a bordo, isto é, o C. I. F. o qual resulta da soma das duas parcelas seguintes:

1°, custo da mercadoria no país de procedência;

2°, frete e despezas até o pôrto brasileiro de destino.

Não inclue, portanto, direitos aduaneiros ou quaisquer gastos ulteriores à entrada das mercadorias nas alfândegas brasileiras.

A separação do custo tem por objetivo facilitar a comparação dos valores de nossas importações com os valores das exportações dos países de que procedem as mercadorias entradas no Brasil.

Os valores expressos em **milréis** correspondem aos resultados da conversão da moeda estrangeira, declarada nas faturas consulares, e que é, desde 1933, exclusivamente o dolar norte-americano, segundo a taxa média mensal do câmbio a vista no mercado livre, de acôrdo com os dados diariamente fornecidos pela Câmara Sindical dos Corretores de Fundos Públicos na Praça do Rio de Janeiro.

Os valores expressos em Libras esterlinas correspondem, até Setembro de 1931, quando foi estabelecida a inconversibilidade da moeda inglêsa, aos resultados da redução da nossa moeda segundo a média mensal do câmbio a vista sobre Londres baseada nos dados da Câmara antes referida. A partir dessa época, a cotação do dolar começou a servir de fundamento ao calculo, obtendo-se a equivalência da libra ouro para conversão dos valores pela paridade entre as duas moedas decorrente da relação 4,8665 dollar (ouro) = £ 1 (ouro), isto é, respectivamente, dolar de 1,50463 gramas e libra de 7,32238 gramas de ouro fino.

Quebrado, em Março de 1933, o padrão monetário norte-americano, substituiu-se a cotação do valor do dolar pela do franco francês, fixando-se, desde então, o valor da libra ouro de acôrdo com a paridade 124,21343 francos ouro = 1 £ (ouro).

Verificada, em Setembro de 1936, a desvalorisação do franco francês, novas modificações foram introduzidas na conversão dos valores a libras ouro, consistindo, inicialmente, em tomar como base da fixação de equivalências o ágio do ouro no mercado de Londres e, a seguir, em operar diretamente a conversão dos dados em moeda americana a moeda inglêsa, adotando como coeficiente de redução a relação entre as quantidades de ouro fino caracteristicas de cada um dos dois padrões, isto é, da libra de 7,32238 gramas de ouro fino e do dolar atual que contém apenas 0,88867 grama de ouro fino.

Relativamente aos valores das presentes estatísticas, convem assinalar ainda que as taxas de conversão adotadas foram as oficiais, desde a atribuição do monopólio de câmbio ao Banco do Brasil por força do decreto n. 20.451 de 28 de Setembro de 1931; restabelecida a liberação do câmbio em Fevereiro de 1935, os valores das importações, declarados em dolars U. S. A. nas faturas consulares, passaram a ser convertidos em moeda nacional pelas cotações do câmbio livre.

Depreende-se destas explicações que os chamados **valores oficiais** ou de **pauta** – designação comumente dada, em técnica fiscal, aos valores convencionais fixos atribuidos ao custo das mercadorias para efeito de arrecadação tributária – em coisa alguma interferem no cálculo dos valores das importações consignados neste boletim, os quais são, tanto quanto é possivel pretender em estatística, puramente **comerciais**, tendo a sua legitimidade atestada pelas Câmaras de Comércio das praças de procedência, que, nas faturas comerciais anexas às consulares, os declaram em plena conformidade com os preços correntes da mercadoria nas referidas praças.

Origem ou procedência das mercadorias – Até 1917, inclusive, a estatística de importação era apurada pelos países de origem das mercadorias, embora adquiridas estas em local diverso do de sua produção e assim, por exemplo, as mercadorias originárias da India, adquiridas em Hamburgo, figuravam como importadas dessa colônia, inglesa e não da Alemanha. Ora, sendo a estatística comercial uma estatística de trocas internacionais, onde se registram as relações de compra e venda entre países, e não uma estatística de produção, modificou-se, em 1918, o critério até então seguido, figurando, a partir dessa época, em vez do país de origem, o de venda ou de procedência, que é aquele em que a mercadoria é adquirida e de onde é expedida para o Brasil. Assim, a mercadoria adquirida na Suiça pelo negociante do Brasil e remetida para Bordéus, afim de ser daí embarcada para Santos, figura no presente boletim como importada da Suiça: se, porém, fôr originária da Suiça, mas adquirida em França, é este último país que aparece mencionado nos competentes quadros.

Destino das mercadorias – O destino das mercadorias é a estação aduaneira indicada na fatura consular como sendo aquela por onde se deverá verificar a sua entrada no país. Não discrimina, pois, esta publicação o verdadeiro movimento por Estados, mas apenas a quantidade e o valor das mercadorias desembarcadas nos pôrtos de cada Estado, seja para seu próprio consumo, seja em trânsito para outro Estado. Assim, por exemplo, grande parte das mercadorias entradas do exterior pelo pôrto do Rio de Janeiro se destina ao consumo dos Estados de Minas Gerais, de Goiáz e do Rio de Janeiro, do mesmo modo que parte das importadas através da alfândega de Recife se destina ao consumo dos Estados de Alagôas, Sergipe, Paraíba, etc., fato que tambem ocorre, em menor escala, relativamente a outras unidades federadas.

EXPORTAÇÃO

Sob a designação de exportação compreende este boletim todas as mercadorias de produção nacional, [illegible] para países estrangeiros e [illegible] nos manifestos de saída dos navios que partem de portos brasileiros para o exterior ou pelas guias de exportação quando esta é feita por via terrestre.

Quantidade – As quantidades consignadas neste boletim correspondem às declaradas nos manifestos ou guias a que se acha de aludir.

Valor – Os valores das mercadorias exportadas constantes da presente publicação são baseados nos preços correntes em cada praça expedidora, acrescidos das despezas de carreto, acondicionamento, impostos e taxas de exportação, etc., o que vem a representar o valor da mercadoria posta a bordo no Brasil, isto é, F. O. B. Na sua totalidade esses valores exprimem, com a possivel exatidão, o que despendeu o o estrangeiro, em moeda nacional, para adquirir a mercadoria no Brasil.

Ainda aqui, por conseguinte, os algarismos divulgados correspondem aos chamados **valores comerciais**, dentro da modalidade particular a que o Instituto Brasileiro de Geografia e Estatística já convencionou denominar **valores comerciais de mercado**, por oposição **aos valores comerciais de fatura**, a cuja categoria pertencem os dados dessa natureza, elaborados relativamente a importação.

Apurados, assim, os valores em milréis das exportações, a sua conversão a libras obedeceu, até fevereiro de 1935, às mesmas bases expostas a respeito da importação. A partir dessa época, tornou-se necessario levar em conta a entrega, à taxa oficial, de 35% do valor das cambiais de exportação ao Banco do Brasil, por isso que se divulgariam resultados inconciliáveis com os dados básicos da coleta se a conversão fosse feita pela aplicação integral da taxa do câmbio livre ao valor estatísticamente apurado para os produtos vendidos ao estrangeiro como **expressão das cotações correntes nos mercados internos**. De, fato, se o valor em moeda inglesa, obtido nestas condições, viesse a ser tomado como efetivamente representativo das vendas dos produtos nacionais ao exterior, a colocação das cambiais resultantes, com a entrega de 35% à taxa oficial, teria de dar, em moeda brasileira, importancias inferiores as correspondentes realmente aos preços de venda nas praças do país.

Como este «Serviço» baseia a sua apuração estatística exclusivamente em tais preços, desconhece por completo os resultados das vendas nas moedas em que se devem liquidar os respectivos saques.

Assim, parece perfeitamente adequado o critério que adotou na conversão a libras ouro do valor das exportações do Brasil para conformar as bases em que é apurado ao intuito de obter nos resultados finais o sentido mais acorde possivel com as verdadeiras condições dos ajustes de contas oriundos do comércio internacional. Aliás, a prática geral, relativamente às estatísticas de exportação, é justamente a de basear os seus valores sobre os preços dos mercados internos; sómente as repartições congêneres, de outros países, não costumam ir além dos valores expressos em suas próprias moedas, ficando, desse modo, a coberto dos precalços inerentes aos regimes de câmbio controlado.

Convertendo, sistematicamente, ha 38 anos, à moeda ouro os valores expressos em milréis do comércio exterior do Brasil, a repartição incumbida da respectiva estatística lançou mão do meio que lhe pareceu adequado a manter a comparabilidade dos algarismos através do tempo, objetivo a que se opunha a instabilidade desde ha muito peculiar à nossa moeda e atualmente generalizada à de todos os países. Foi esse justamente o recurso mais tarde empregado pela Liga das Nações para tornar passíveis de confronto os valores do comércio mundial e alguns países o veem recentemente aplicando às cifras globais do seu movimento.

Referidos assim a um padrão comum intrinsecamente invariavel os valores do intercâmbio mercantil entre nações podem constituir medida segura não apenas do poder aquisitivo do ouro, senão tambem das flutuações de preços dos produtos, trocados nos mercados internacionais, através de períodos de longa duração.

Sob este aspecto, são de especial significação os quadros do movimento mensal em contos de réis, libras ouro, libras papel e dolares americanos, ao lado das respectivas quantidades, dados que, sempre consignados nas publicações mensais relativas ao comércio exterior do Brasil, foram tambem incluidos no presente boletim.

De outro lado, a estatística brasileira foi tambem a pioneira da apuração em toneladas não só no total global do intercâmbio, como na discriminação por países e portos de destino ou procedência, diretriz que se veio a tornar grandemente generalizada, com real alcance, sobretudo nas emergências da confusão monetária da hora presente em que as quantidades preenchem de modo mais imediato a função de índices de ordem econômica.

Procedência das mercadorias – A procedência, na exportação, é o porto brasileiro onde a mercadoria embarca para o exterior. Portanto, os dados que figuram nos quadros da exportação por Estado e respectivos portos não representam, de fato, os algarismos da produção exportavel de cada um deles, mas sim o que saíu pelo mencionado porto em demanda do exterior. É assim que as expedições dos portos de Manáus e de Belém do Pará englobam toda a exportação do Território Federal do Acre, bem como parte da do Estado de Mato Grosso. Do mesmo modo, por Pernambuco e Baía saem muitas mercadorias originárias de Estados confinantes, e pelo porto do Rio de Janeiro se escôam produtos dos Estados do Rio de Janeiro, de Minas Gerais, de Goiáz, do Espírito Santo e do norte de S. Paulo. A parte da exportação do Piauí realizada pela ilha do Cajueiro, sujeita à jurisdição do Maranhão, que figurava nos boletins anteriores como procedente desta última Unidade Federada, aparece agora no lugar devido, como expedição do porto de Parnaíba, em cuja alfândega é despachada e de onde é encaminhada em pequenas partidas, afim de embarcar nos transatlanticos a que se destina, não obstante o necessário saldo.

Destino das mercadorias – O destino das mercadorias de exportação é o declarado nos manifestos. Apesar de nem sempre ser esse o seu destino ulterior, carece este Serviço de Estatística de meios para determinar com segurança a praça a que vão ter em definitivo. De outro lado, não dispondo o Brasil de linhas diretas de navegação para todos os países, acontece que muitos destes deixam de aparecer entre os importadores de seus produtos, enquanto que outros figuram indevidamente, com quantidades maiores que as que realmente importam. Assim, constam como importadas pelo Uruguai e pela Argentina mercadorias saídas de Mato Grosso e Rio Grande do Sul e que são transbordadas em Montevidéu ou Buenos Aires para a Europa e os Estados Unidos. Acontece, também, que os países mediterrâneos da Europa, como a Suiça, por exemplo, figuram com algarismos aquém das suas reais aquisições no Brasil, emquanto outros, como a Holanda e a Alemanha, se apresentam em situação perfeitamente inversa.

A deficiência, reconhecida, sob este e outros aspectos, nos manifestos utilizados como documentos de coleta das estatísticas de exportação ora divulgadas, poderá em parte ser removida com a adoção generalizada da «Guia de Exportação», preenchidas diretamente pelos expedidores segundo regulamento adequado, sistema que, em vigor relativamente ao Rio Grande do Sul desde 1917, ha, em 1939, definitivamente incorporado aos processos de elaboração segundos por este «Serviço.»

AMPLIAÇÃO DE CLASSES

O quadro geral das classes de apuração das mercadorias que já apresentava, em 1936, sensíveis aperfeiçoamentos em relação a 1934, sobre que se assentou a importação, continuou a ser ampliado, no ano de 1937, para atender à crescente diversificação de produtos, decorrente das predominâncias ou restrições observadas nas correntes constitutivas do comércio exterior do Brasil, evidenciando os algarismos abaixo o vulto das variações ocorridas segundo as respectivas grandes classes

Acréscimo no número de classes de 1934 para 1937

ESPECIFICAÇÃO		Nº de classes		Acréscimos	
		1934	1937	Total	%
Importação	Classe I	16	18	2	13
	Classe II	182	286	104	104
	Classe III	671	764	283	108
	Classe IV	87	87	20	30
Total		956	1.135	609	97
Exportação	Classe I	83	98	15	18
	Classe II	66	73	7	11
	Classe III	219	239	26	12
Total		367	410	48	13

É preciso atender a que, na revisão a que se procedeu, muitas mercadorias importadas tiveram de ser deslocadas em relação aos portos dos anteriores a 1936, assim, passaram da Classe III – Artigos manufaturados, para a Classe II – Materias primas, entre outras, a gasolina e os óleos combustiveis ou lubrificantes, e, da Classe II para a Classe IV – Artigos de alimentação, entre outros, a cevada para fabricação de cerveja e o trigo, tendo dessa última sido retirado o sal não destinado à alimentação, isto é, não refinado, o qual foi transferido para a Classe II.

De outro lado, havendo-se adotado o critério de, tanto quanto possível, levar em conta a matéria prima predominante nos produtos importados, deu-se ter em vista também esta particularidade, assim no agrupamento «Máquinas, aparelhos, etc.» (Classes 242 a 248), todas

os acessórios e sobressalentes, não importados com as respectivas máquinas, passaram a fazer parte dos agrupamentos referentes à matéria prima correspondente, respectivamente ao ferro, a madeira, o couro, etc. Na mesma ordem de ideias, deixaram de ser incluidos no agrupamento «Vários artigos,» (Classe 365 a 425 B), os dados numéricos referentes às mercadorias nele especificadas, cuja matéria prima predominante, sendo conhecida, lhes permitiu a inclusão nos competentes agrupamentos, generalizando-se desse modo o critério ha pouco mencionado.

Uma cuidadosa observação das novas classes se torna, pois, indispensável a quem pretenda realizar estudos comparativos com períodos anteriores, convindo, para isso, ter sempre em vista as referências constantes da presente publicação para as classes abertas em em 1937 e do boletim resumo precedente para as modificações anteriores.

Havendo as alterações por ampliação e transferência, que acabam de ser assinaladas, feito sentir a conveniência de uma revisão e redistribuição geral das classes de mercadorias especificadas, foi o quadro ainda seguido na presente publicação completamente remodelado, passando a constituir, em 1938, um sistema de classificação rigorosamente conformado ao critério de ordenação decimal.

Valor internacional da moeda brasileira

O valor da moeda brasileira em relação à libra esterlina e ao dolar norte-americano, além das variações decorrentes do curso normal do câmbio, encerra, na presente publicação, um aspecto todo especial. É êle consequente das bases de conversão adotadas para conformar os resultados da apuração estatística com as restrições cambiais aplicadas unilateralmente às exportações desde 1935, consoante ficou antes explicado (Vide página II). Daí não se restringirem às variações mínimas observadas até 1934 as diferenças entre os valores médios anuais das moedas estrangeiras, resultantes da divisão dos valores em milréis pelas suas respectivas equivalências em cada uma dessas moedas, respectivamente, na importação, na exportação e no total do comércio exterior. Essas variações mínimmas do fato provinha de tais quocientes exprimirem médias ponderadas em que os pesos, devidos às diversidades dos montantes convertidos cada mês à taxa mensal média do câmbio, conduziam, como é óbvio, a valores médios anuais ligeiramente divergentes em cada uma das duas correntes, como no seu total, apezar de ser única a base das reduções mensais. A partir de 1935 a discrepância deveria fatalmente acentuar-se em virtude da orientação que teve de ser seguida como recurso mais adequado a atender às circunstancias decorrentes das medidas de contrôle estabelecidas unicamente para as cambiais de exportação, em 11 de fevereiro daquele ano.

O quadro abaixo consigna os valores médios anuais da libra esterlina e do dolar U. S. A. respectivamente correspondentes às discriminações dele constantes, no periodo de 1928 a 1937 e resultantes da divisão dos valores globais em moeda brasileira, incluidos na página X, pelos seus equivalentes em cada uma das moedas estrangeiras aí indicadas.

Finalmente, para devida apreciação desse quadro, convem lembrar as fases atravessadas pelo mercado cambial:

– de outubro de 1931 a agosto de 1934, contrôle integral do mercado de câmbio com insensiveis exceções desde maio dêsse último ano;

– de setembro de 1934 a janeiro de 1935, cobertura das importações à razão de 60% ao câmbio oficial e 40% no mercado livre, assegurada ao Banco do Brasil a retenção de 155 francos franceses por saca de café exportado;

– a partir de 11 de fevereiro de 1935, liberação do câmbio para as importações, estabelecendo-se a entrega ao Banco do Brasil, à taxa oficial, de 35% do valor das cambiais de exportação com restrítas concessões posteriores;

– a partir de dezembro de 1937, liberação completa do mercado de divisas e estabelecimento de taxas especiais para consutuição de um fundo de cambio, modificação que, pelo curto período a que se aplicou, não chegou a ter influência sensível sobre os dados do último ano consignado neste boletim.

EXPLANATORY NOTES

PRELIMINARY

The annual statistics of Brazil's foreign trade have for some years been published in two series of publications; namely, the **sumarised-bulletins** and the **general-bulletins.**

The **summarised bulletins,** up to the last one issued, relating to the years 1935 and 1936, always contained the following principal statistical tables:

a) the quantities and values, during the past two years, of all **imported** or **exported** merchandise, that are nominally computed by this service, but without reference to the places of consignment or of destination;

b) the quantities and values of the **leading imported or exported merchandise,** during the past five years, with reference, for the imported goods, to the country of consignment or to the Brazilian port of destination and, for the exported goods, to the country of destination and to the port of shipment, in Brazil; or in either of the two cases, to the custom-house districts on land frontiers;

c) the quantities and total values of the incoming and outgoing flow of trade during the past five years, by countries of origin and destination.

As a distinctive feature, the **general bulletins** issued included figures referring to sources of origin or places of destination in the case of all imported or exported merchandise, completing in this respect the information given in the **summarised bulletins.**

The present publication pertains to the series of **general-bulletins** and contains statistics referring to the lustrum 1933-1937, and will be the last of the series, as the annual bulletins will, as from those relating to the years 1937 and 1938, be of a single type which will include, under one head, all the information contained in the publications mentioned, but covering only a biennial period.

IMPORTS

This section includes only merchandise of foreign origin imported for consumption in Brazil.

The items of merchandise listed in the tables correspond to the general trade of Brazil, which includes merchandise already cleared for consumption as well as that which is in custom-houses for that purpose or to be reexported. Merchandise in transit to other countries is not included.

Quantities, values, origins and destinations of merchandise are those which are declared in consular invoices, from which the import statistics of Brazil are prepared.

Quantity – Quantities, shown in kilograms, represent net weights of the products, exclusive of wrappers, cases or packing of any description, external or internal.

Value – Value shown in tables represents c. i. f. costs including:

1. Cost of merchandise in country of consignment.
2. Freight and expenses to the Brazilian port of destination.

Values do not include customs duties or any other expenses after the entry of merchandise into Brazilian custom-houses.

The reason for indicating costs separately is in order to facilitate the comparison of values shown in Brazilian import statistics with statistics of exports from foreign countries to Brazil.

Values expressed in milreis are calculated by converting the foreign currency declared in consular invoices, which, since 1933, is exclusively the American dollar, at the average **monthly exchange rate** at sight of the dollar in the free market, in **accordance with rates** supplied by the Stock Exchange of Rio de Janeiro.

Values expressed in Pounds Sterlings were, until September 1931, **when the English Currency became inconvertable, derived from the conversion of our currency, according to the average monthly rate of** exchange at sight on London, based on data supplied **by above** mentioned Stock Exchange. From September 1931, the quotation of the dollar came to serve as a basis of calculation, obtaining the value of the gold pound by the parity between the two currencies, expressed by the relation $4,8665 (gold) equals £ 1 (gold), i. e. the dollar at 1.50463 grammes and the pound at 7.32238 grammes of fine gold respectively.

In March 1933, when the United States went off the gold standard, the dollar quotation was substituted by that of the French franc, fixing, from that date, the value of the gold pound in accordance with the parity 124.21343 French [illegible] 1 pound gold.

In September 1936, [illegible] two new methods of converting values [illegible] were adopted, consisting, initially, in taking as a base for [illegible] the gold premium on the London market and afterwards [illegible] the conversion of the proceeds in U. S. [illegible] the coefficient of reduction the relation between [illegible] of fine gold corresponding to the two circulating media [illegible] grammes of fine gold and the present [illegible] which contains only [illegible] grammes of fine gold [illegible]

It is necessary further, in connection with values, to point out that since the Bank of Brazil obtained an exchange monopoly by Decree [illegible] When free exchange became available in February 1935, import values expressed in American dollars in consular invoices, came to be converted into Brazilian currency at the free rate of exchange.

It will be understood from the f[illegible] that the so-called official values or **pautas** – [illegible] in fiscal parlance, to the conventional [illegible] of merchandise for purposes of tax [illegible] the assessment of the imports contained in this [illegible] which are, as far as it is possible to define by statistics, [illegible]

Origin of merchandise – Up to and [illegible] import statistics were compiled according to the countries of origin of the merchandise, regardless of it being acquired at a place other than that [illegible]

As an example, merchandise originating in India and acquired by us in Hamburg, would appear as having been imported from India and not from Germany.

Since commercial statistics represent figures of [illegible] trade in which purchase and sale relations between c[illegible] and not production statistics, in 1918 it was decided to change the procedure followed up to then, appearing from that date onwards, instead of the country of origin, that of sale. Once merchandise purchased by us in a determined country and thence shipped to Brazil, either directly or in transit through another country or other countries, it is the country where the purchase was effected which is shown in our statistics.

Thus, merchandise purchased in Switzerland, by a merchant in Brazil, is shown in our statistics as imported from Switzerland where the consular invoice is legalized. If however, the merchandise originates in Switzerland but is bought in France, the latter country is the one appearing in our import statistics.

Destination of merchandise. – The destination of merchandise is the customs station indicated in the consular invoice, to which the merchandise is consigned. These statistics cannot portray the real [illegible] dise discharged at the ports of each State, for [illegible] For example, a great part of the merchandise imported by the port of Rio de Janeiro is destined for [illegible] In the same way, sundry merchandise [illegible] is often destined for consumption in [illegible] Paraíba, etc., this also occurring, to a [illegible] of the Union.

EXPORTS

This section covers all [illegible] to foreign countries, and [illegible] contained in the manifests of ships leaving [illegible] countries, or by export permits when [illegible]

Quantity – Quantities are those [illegible] of export [illegible]

Value – [illegible] merchandise in each [illegible] f. o. b. [illegible] in Brazilian currency [illegible] merchandise in Brazil.

Even in this case, therefore, the figures published correspond to the so-called **commercial values**, within the specific definition which the Brazilian Institute of Geography and Statistics has decided to name **commercial market values**, as opposed to **commercial invoice values**, to which category there pertains the data of this nature in respect of imports.

The values of exports thus compiled, expressed in milreis, were converted into **pounds sterling**, up to February 1935, following the same procedure applied to imports. From that time, it became necessary to take into consideration the delivery, at the official rate, of 35% of the value of the export drafts, because it would produce results inconsistent with the basic data of collection, if the conversion to pounds were made by wholly applying the free market rate to the statistically compiled value for merchandise sold to foreign countries, as expressing current quotations of internal markets. In fact, if the value of the English currency thus obtained should happen to be taken as effectively representing sales of national products to foreign countries, the placing of resulting drafts, with the delivery of 35% at the official rate would give in Brazilian currency amounts inferior to those really corresponding to the prices of sale in the domestic markets. As this department bases its compilation of statistics exclusively on such prices, it has no knowledge whatever of the results of sales in the currencies which must be used for the liquidation of the drafts. Thus, it is perfectly justifiable to adopt the method of converting the values of Brazilian exports to pounds gold, in order to adapt the bases upon which it is compiled to obtain in the final results the figure most in accordance with the real conditions of adjustment of accounts, resulting from international trade. As a matter of fact, the general practice in connection with export statistics is to base the values on internal market prices; however, the departments in charge of the work do not usually go beyond giving values expressed in the currency of the country, thus keeping them free from the perquisites inherent to the regimes of controlled exchange.

This Department, for the last 38 years, having systematically converted to gold the foreign trade values expressed in milreis, tried to make the figures comparable throughout the periods, to which purpose the instability of our currency did not lend itself. Nowadays, when such instability is general this is the procedure adopted by the League of Nations so as to make possible the comparison of values of the world's trade, and some countries have recently taken advantage of this procedure with regard to the total figures of their trade. As a result of their being based on an intrinsically invariable common standard, the values of commercial intercourse between nations may constitute a sure measure not only of gold purchasing power, but also of the fluctuations in price of merchandise exchanged on international markets over lengthy periods.

In this respect special significance attaches to statistics of the monthly movements in contos of reis, gold pounds, pounds sterling, and U. S. dollars, together with the respective quantities always shown in the monthly publication of Brazil's foreign trade, and which are also included in the present bulletin. Besides this fact, Brazilian statistics were also the first ones to be compiled in tons, not only of the total trade, but also in the listing by countries and ports of destination or origin, which procedure became greatly generalized and is especially suited to such emergencies, such as the present-day monetary confusion, where quantities may fulfil more immediatly the function of indices of an economic nature.

Origin of merchandise. – In export statistics the origin is represented by the Brazilian place from which the merchandise is loaded to foreign countries. Therefore, on the table of exports by States and their respective ports, the values do not represent actually the values of exportable production of each of them, but represent what was shipped abroad by the port mentioned.

In this way, export figures of the ports of Manaos and Para embody all exports from the Acre Federal Territory, as well as part of those from the State of Matto Grosso.

Through the ports of Pernambuco and Baia a great amount of merchandise originating in the adjacent States is exported.

Exports from the States of Rio de Janeiro, Minas Gerais, Goyas, part of Espirito Santo, and some products from northern São Paulo, are shipped through the port of Rio de Janeiro.

Exports from the State of Piauhy shipped via the Ilha do Cajueiro, under the jurisdiction of the State of Maranhão, which have hitherto figured in bulletins as originating in the latter State, now appear in their correct place as proceeding from the port of Parnahyba, through whose customs house they are cleared and from where the merchandise is carried in lighters to the island in question for shipment by transatlantic vessels for which there is insufficient depth of water in the ports of the State of Piauhy.

Destination of merchandise – The destination of merchandise exported is that declared in the manifests; however, that is not always the definite destination of merchandise. There are no means for accurately determining in these statistics the final destination of merchandise.

As Brazil does not have direct navigation lines to all countries, it so happens that many countries are not shown as importers of our products, whereas others are shown, unduly, with larger quantities than those which they really import.

Merchandise from Matto Grosso and Rio Grande do Sul, shipped to Montevideo or Buenos Ayres and than re-shipped to Europe and the United States, is shown as imported by Uruguay and Argentina.

It happens also that inland European countries, like Switzerland for example, show figures inferior to their real acquisitions from Brazil, whereas exactly the opposite happens to other countries like Holland and Germany.

In this instance, as well as in others, the deficiency of the schedules used in collecting present statistical data may only be partially removed with the general adoption of «export permits» duly filled out by exporters, in accordance with proper regulation, a system which has been followed in respect of the State of Rio Grande do Sul since 1917 and was definitely incorporated in the compilation procedure of this «Service» in 1939.

EXPANSION OF CLASSES

The general list of classes for the classification of merchandise, which contained even in 1936 an appreciable number of additions over the 1934 list, especially as regards imports, was further expanded in 1937 in order to meet the necessity for the discrimination of merchandise arising out of the changes in the flow of the merchandise constituting Brazil's foreign trade. The following figures show the alterations made in the various general classifications:

INCREASE OF CLASSES, FROM 1934 TO 1937

CLASSIFICATION		Existing items		Increases	
		1934	1937	Total	%
Imports	Classe I	[illegible]	[illegible]	[illegible]	[illegible]
	Classe II	[illegible]	[illegible]	[illegible]	[illegible]
	Classe III	[illegible]	[illegible]	[illegible]	[illegible]
	Classe IV	[illegible]	[illegible]	[illegible]	[illegible]
Total		[illegible]	[illegible]	[illegible]	[illegible]
Exports	Classe I	[illegible]	[illegible]	[illegible]	[illegible]
	Classe II	[illegible]	[illegible]	7	[illegible]
	Classe III	[illegible]	[illegible]	[illegible]	[illegible]
Total		[illegible]	[illegible]	[illegible]	[illegible]

Importation. – It should be noted that, in the revision made, many imported products were changed from large classes in relation to periods prior to 1935. In this manner, some «Manufactured Articles» passed from Class III to Class II, – «Raw Materials», – such as gasoline, kerosene and combustible or lubricating oils, and from Class II to Class IV – «Food stuffs», went barley for the manufacture of beer and hops. Salt not destined for human consumption, that is, not refined, was changed to figure under Class II instead of Class IV.

The procedure adopted being to take into consideration, as much as possible, the predominant raw material of the imported products, this particular must also be kept in mind, [illegible] machines, apparatus, etc. [illegible] 282 [illegible] all accessories and spare parts imported [illegible] have respectively been transferred to the corresponding [illegible] groupings, whenever [illegible] as predominant material [illegible], wood, leather, etc.

Another grouping which deserves special mention is that of «Sundry Articles» (items 365 to 425 A), in which there are no longer included [illegible] hose, [illegible] raw material being known [illegible].

A careful observation [illegible] comparative studies [illegible] should bear in mind the [illegible] the classes opened in 1937 and in preceding [illegible] modifications.

In view of the fact that such alterations, by additions or transfers, have demonstrated the advisability of a revision and general reclassification of classes of specified merchandise, the system followed in the present publication has been completely remodelled and as from 1938 comprises a method of classification conforming to a strictly decimal system.

INTERNATIONAL VALUE OF BRAZILIAN CURRENCY

The value of Brazilian currency in relation to the pound sterling and the American dollar, besides variations occurring in the normal course of exchange, presents in this publication a very special aspect. It results from the bases of conversion adopted so as to make the results of compilation of statistics comply with exchange restrictions, applied unilaterally to exports since 1935, as explained above. (See page V). Thence, the differences between the average annual values of foreign currencies, resulting from the division of values in milreis by their equivalent in each of those currencies for importation, exportation, and total foreign trade, respectively, are not restricted to the minimum variations presented up to 1934. Those minimum variations arose from the fact that such quotients expressed weighted averages, where the weights, owing to the diversities of amounts converted each month at the average monthly rate, obviously led to average annual values, slightly different in each movement as well as in their total, in spite of there being a single monthly reduction base. Starting with 1935, the discrepancy would fatally be noticeable due to the procedure which this Department has to adopt, as better means to comply with the circumstances resulting from the measures established only for exportation, in February 11 of that year.

The table below gives the annual average values of the pound sterling and of the dollar, respectively, corresponding to the bases therein contained for the period from 1928 to 1937 and resulting from the division of the general figures in Brazilian currency found on page X by their equivalents in each one of the foreign currencies mentioned on it.

At least for the proper study of that table, attention is called to the phases through which the exchange market has gone:

– from October 1931 to August 1933, complete control of the exchange market, with imperceptible exceptions since May of the last mentioned year;

– from September 1934 to January 1935, coverage for importations at the rate of 60% on the official exchange and 40% on the free market, the retaining of 125 French francs per bag of coffee exported being attributed to the Bank of Brazil;

– from February 11, 1935, liberation of exchange for importations, there being established, with restricted concessions, the delivery to the Bank of Brazil, at the official rate, of 55% the value of exports drafts;

– from December 1937, complete liberation of the exchange market and the introduction of special taxes for the creation of an exchange fund, a modification which, due to the short period during which it applied, had no appreciable influence on the data relating the last year covered by this tradition.

(1) Until September 1931, £ of 7.32238 grams of fine gold; from this date on, £, paper.
(2) Until March 1933, dollar of 1.50463 grams of fine gold; from this date on, dollar of 0.89867 gram of fine gold.
(3) £ of 7.32238 grams of fine gold.

NOTES EXPLICATIVES

INDICATIONS PRÉLIMINAIRES

Les statistiques annuelles du commerce extérieur du Brésil sont portées à la connaissance du public depuis plusieurs années dans deux séries de publications: celle des **bulletins-résumé** et celle des **bulletins généraux.**

Comme données principales des bulletins-résumé sortis, dont le dernier se rapporte aux années 1935 et 1936, y ont toujours figuré:

a) les quantités et les valeurs, pour les deux dernières années, de toutes les marchandises, qui sont spécifiées dans le cadre général établi pour le dépouillement, sans indiquer, toutefois, les provenances et non plus les destinations;

b) les quantités et les valeurs des principales marchandises, concernant les deux cours des échanges, pendant les cinq dernières années, avec l'indication, pour les importations, du pays d'origine et du port national de décharge et, pour les exportations, du pays de destination et du port brésilien d'embarquement, ou, respectivement, pour les deux cas, de la douane de la frontière terrestre par où la marchandise est entrée ou sortie;

c) les valeurs totales de chaque cours, pendant les cinq dernières années, d'après les provenances et les destinations.

Les bulletins généraux se sont distingués surtout par le fait de consigner les provenances et les destinations de toutes les marchandises importées ou exportées dans la période d'un quinquennium, en complétant, sous ce rapport, les informations partielles des bulletins-resumé.

C'est à la série des **bulletins généraux** qu'appartient la présente publication qui, portant les chiffres relatifs au quinquennium 1933-1937, sera la dernière de ce genre, car les bulletins annuels, à partir du relatif à l'année de 1938, obéiront à un type unique, lequel renfermera, dans l'ensemble, toutes les données des deux séries de publications mentionnées, mais seulement pour la période de deux années.

IMPORTATION

Cette désignation comprend, exclusivement, les marchandises d'origine étrangère, introduites au Brésil pour la consommation.

Les marchandises, désignées dans les listes ou les tables, correspondent à l'importation générale, qui comprend aussi bien les marchandises déjà livrées à la consommation que celles ayant la même destination, en dépôt dans les douanes, et celles qui sont à réexporter. Les marchandises, en trânsit, à destination d'autres pays, n'y figurent pas.

Les quantités, les valeurs, les provenances et les destinations des marchandises sont celles déclarées dans les factures consulaires, qui sont la base de la statistique de l'importation au Brésil.

Quantité – Les quantités, dont l'unité de mesure est le kilogr. expriment le poids net réel des marchandises, séparées de leurs emballages, tant extérieurs qu'intérieurs.

Valeurs. – La valeur des marchandises, dont on fait rapport dans les tableaux, est la valeur libre à bord, c'est-à-dire, la valeur C. I. F., laquelle représente la somme des deux parcelles suivantes:

1°. du prix de la marchandise dans son pays de provenance;

2°. du prix de transport jusqu'au port brésilien de destination;

C'est, donc, une valeur qui ne comprend pas les droits des douanes brésiliennes.

La division des prix a pour but de rendre facile la comparaison des valeurs de notre statistique d'importation avec celles de l'exportation d'autres pays à destination du Brésil.

Les valeurs, représentées en milreis, se rapportent aux résultats de la conversion de la monnaie étrangère, déclarée dans les factures consulaires, et qui n'est, depuis 1933, qu'uniquement le dollar américain, selon le taux moyen mensuel du change à vue, d'après les données fournies par la «Chambre Syndicale des Courtiers en Fonds Publics» de la ville de Rio de Janeiro.

Les valeurs, représentées en livres sterlings, se rapportaient, jusqu'à Septembre 1931, lorsqu'on a établi l'inconversibilité de la monnaie anglaise, aux résultats de la conversion de notre monaie, d'après le taux moyen mensuel du change à vue sur Londres, basé sur les données de la Chambre sus-citée. A partir de cette époque, la cotation du dollar commença à servir de base calcul, en parvenant à la valeur de la livre or, par la parité entre les deux monnaies, c'est-à-dire 4,8665 dollar (or) = £ 1 (or), soit, respectivement, dollar de 1,50463 grammes et £ de 7,32238 grammes d'or fin.

Modifiée, en Mars 1933, la parité monetaire américaine, on remplaça la cotation du dollar par le franc français, en fixant, à partir de cette date, la valeur de la livre, or, d'aprés rélation 124,21343 francs = 1 livre (or).

Aprés la dépréciation du franc, en Septembre 1936, une nouvelle modification fut introduite pour la conversion des valeurs en livres sterling, or, consistant, au début, à prendre, comme base d'équivalence, l'agio or du marché de Londres, puis ensuite, à opérer directement la conversion, en monaie anglaise, des chiffres obtenus en monnaie américaine, en adoptant, comme coefficient de réduction le rápport entre les quantités d'or fin caractéristiques de chacun des deux étalons monétaires, c'est-à-dire, de 7,32238 grammes d'or fin pour la livre, et de 0,88867 gramme d'or fin qui contient le dollar actuel.

Il faut encore souligner que, depuis l'établissement du monopole du change attribué à la Banque du Brésil, par le décret n. 20.451 du 28 Septembre 1931, les taux adoptés, concernant les valeurs, ont été les taux du marché officiel; rétablie la libération du change, en Février 1935, la valeur déclarée en dollars U. S. A. dans les factures consulaires, est convertie en monnaie nationale, d'aprés la cotation du change libre.

Il ressort de ces explications que ce qu'on appelle **valeurs officielles** ou de «**pauta**» – désignation communément appliquée, en technique fiscale, aux valeurs conventionnelles fixes attribuées au coût des marchandises aux effets des opérations tributaires, – n'interviennent, en aucune façon, dans le calcul des valeurs des importations consignées dans le bulletin. Ces valeurs sont, pour autant qu'il soit possible d'y prétendre en matière statistique, purement commerciales. La légitimité de telles valeurs est confirmée par la Chambre de Commerce des villes de provenance qui, dans les factures commerciales, annexes aux factures consulaires, déclarent leur pleine conformité avec les prix courants de la marchandise, dans les villes mentionnées

Origine ou provenance des marchandises. – Jusqu'à 1918, exclusivement, l'importation représentait les pays producteurs ou fabricants des marchandises quels que fussent ceux qui nous les avaient vendues ou exportées au Brésil. La statistique commerciale, n'étant pas une statistique de production, mais bien d'échanges internationaux, à partir de 1918, les pays, qui figurent à l'importation, sont ceux d'où la marchandise a été expédiée en destination au Brésil, soit directemente, soit en traversant d'autres pays, même avec changement de moyens de transport dans ces pays.

Ainsi, les marchandises achetées en Suisse et expédiées de Berne au Brésil, voie Bordeaux, figurent à la statistique comme provenantes de la Suisse.

Toutefois, la marchandise originaire de la Suisse, étant acquise en France, c'est ce dernier pays qui figure, maintenant, dans notre importation.

Destination des marchandises. – La destination des marchandises est la station douanière, indiquée dans la facture consulaire, à laquelle elles sont consignées. Cette statistique ne peut pas indiquer le véritable mouvement par État, mais seulement la quantité et la valeur des marchandises importées dans les ports de chaque État, soit pour sa propre consommation, soit en transit pour un autre État. Ainsi, par exemple, une grande partie des marchandises importées par le port de Rio de Janeiro est destinée à la consommation des Etats de Minas Geraes, Ceará et de Rio de Janeiro; de même, des marchandises, importées par le port de Recife, sont destinées à la consommation des Etats d'Alagoas, de Sergipe, Parahyba, etc. fait qui se reproduit, quoique moins fréquemment, pour d'autres Etats du Brésil.

EXPORTATION

Cette désignation comprend toutes les marchandises de production nationale, exportées pour l'étranger et dépuchées selon les déclarations faites dans les certificats de chargement de sacoirs, qui sortent des ports brésiliens pour l'extérieur de la République, ou par les lettres de voiture, ou récépissés d'exportation, quand elle est effectuée par voie terrestre.

Quantité - Les quantités représentées sont celles déclarées dans les certificats de chargements, les lettres de voiture ou récépissés d'exportation, dont on vient de parler.

Valeur. – Les valeurs sont calculées d'après les prix courants des marchandises sur chaque place d'exportation, augmentés des frais de charroi, de conditionnement, des droits à payer à l'Etat, etc. ce qui représente la valeur de la marchandise mise à bord au Brésil, c'est-à-dire, la valeur Fob. Dans leur totalité, ces valeurs expriment, aussi approximativement que possible, ce que l'étranger a payé, en monnaie brésilienne, pour entrer en possession de la marchandise, au Brésil.

Ici encore, par conséquent, les chiffres publiés correspondent à ce qu'on est convenu d'appeler des **valeurs cmmerciales**, en restant dans la modalité particulière que l'Institut Brésilien de Géographie et Statistique a décidé de dénommer **valeurs commerciales de marché**, par opposition aux **valeurs commerciales de facture**, à la catégorie desquelles appartiennent les données de cette nature élaborées en ce qui touche à l'importation.

Ainsi établies les valeurs exprimées en **milréis**, leur conversion en **livres, or**, suivit, jusqu'à Février 1935, les mêmes bases exposées par rapport à l'importation. A partir de cette époque, il a fallu tenir compte de la remise, selon le taux officiel, de 35%, de la valeur des letres de change de l'exportation; en fait, on aurait des résultats inconciliables avec les données basiques du relevé, en faisant la conversion en livres suivant l'application totale du taux de change libre à la valeur, statistiquement trouvée, pour les produits vendus à l'étranger, comme expression des cotations courantes aux marchés internes. En verité, si la valeur en monnaie anglaise, obtenue dans de pareilles conditions, était prise comme effectivement représentative des ventes des produits nationaux à l'étranger, le placement des lettres de change, qui en résulteraient, avec la remise de 35% au taux officiel, devrait représenter, en monnaie brésilienne, des sommes inférieures à celles, auxquelles se rapportent, réellement, les prix de vente dans les villes du pays.

Puisque ce Bureau établit son dépouillement statistique exclusivement d'après ces prix, il méconnait, tout à fait, les résultats des ventes selon les monnaies dans lesquelles on doit régler les traites Ainsi il semble tout à fait juste le critère, adopté pour la conversion en livres, or, de la valeur des exportations du Brésil, pour la mettre en conformité avec les bases, sur lesquelles elle est estimée, et en vue d'obtenir, dans les résultats finals, un sens le plus possible d'accord avec les véritables conditions de l'arrêté des comptes, originaires du commerce international.

La pratique générale, d'ailleurs, concernant les statistiques de l'exportation, consiste essentiellement à établir, les valeurs d'après les prix des marchés internes; seulement, les bureaux d'autres pays n'ont pas l'habitude d'aller au délà des valeurs exprimées dans leurs monnaies mêmes, en restant, ainsi, à l'abri des obstacles liés au régime des changes contrôlés.

En convertissant, systématiquement, en monnaie or, les valeurs de son commerce extérieur, exprimées en milréis, ce Bureau a tâché d'assurer la comparabilité des chiffres à travers le temps, résultat que l'instabilité de notre monnaie empêchait alors d'obtenir

C'est le moyen auquel, justement à présent, quand une telle instabilité s'est généralisée, la Société des Nations a eu recours, afin de rendre possible la confrontation des valeurs du commerce mondial et quelques pays ont adopté le même système par rapport aux chiffres globaux de leur mouvement.

Rapportées ainsi à un étalon commum intrinséquement invariable, les valeurs des échanges mercantiles entre nations peuvent constituer une mesure certaine, non seulement du pouvoir d'achat de l'or, mais également des fluctuations de prix des produits échangés sur les marchés internationaux au cours de périodes de longue durée.

Sous cet aspect, les tableaux du mouvement mensuel **en contos de réis, livres or, livres papier et dollars américains**, en regard des quantités respectives, sont particulièrement significatifs. Ce sont des données qui, toujours consignées dans les publications mensuelles relatives au commerce extérieure du Brésil, ont été également comprises dans le présent bulletin.

À côté de cette particularité, la statistique brésilienne fut l'initiatrice du dépouillement quantitatif, non seulement dans le total global de son commerce, mais aussi dans la désignation des pays et [illegible] de destination et de provenance, méthode aujourd'hui trés employée et de grande importance, surtout dans les circonstances de confusion monétaire du moment actuel, où les quantités peuvent remplir d'une façon plus aisée la fonction d'indices de nature économique.

Provenance des marchandises. – La provenance dans l'exportation représente le port brésilien où la marchandise s'embarque pour l'extérieur. Donc, dans le tableau de l'exportation, par Etats et leurs ports respectifs, les valeurs, qui y figurent, ne représentent pas, en fait, les valeurs de la production exportable de chaque [illegible], mais seulement celle qui est sortie par le port mentionné.

C'est ainsi que, dans l'exportation des ports de Manáos et de Pará, figure toute l'exportation du Territoire Féderal de l'Acre, et d'une partie de celle de Matto Grosso. Par Pernambouc et Bahia [illegible] beaucoup de marchandises originaires des Etats auxquels il [illegible].

Par le port de Rio se fait l'exportation des [illegible] Goyaz, d'une partie de celle d'Espirito Santo et de quelques produits du nord de São Paulo.

La partie de l'exportation du Piauhy effectuée par l'Ile du Cajueiro, territoire soumis à la juridiction du [illegible] [illegible] [illegible] du port de [illegible] [illegible] [illegible] l'Etat [illegible] le [illegible] d'eau [illegible].

Destination des marchandises. – La [illegible] des marchandises exportées est celle qui est déclarée dans les [illegible] de chargement, mais ce n'est pas toujours celle-là qui est la [illegible].

Il nous manque [illegible] pour [illegible] avec assurance, dans cette statistique, [illegible].

Le Brésil n'ayant pas de [illegible] pour tous les pays, il en résulte que [illegible] importateurs de nos produits. [illegible] indubitablement, pour des quantités [illegible] importent réellement.

On classe, comme importées [illegible] et par l'Argentine des marchandises venues du Rio [illegible] et qui sont transbordées à Montevidéo ou à Buenos-Aires pour être envoyées en Europe et aux Etats-Unis.

[illegible] l'Europe comme par exemple la Suisse, y figurent représentés par des chiffres [illegible] des achats, qu'ils ont faits au Brésil. [illegible] les Pays-Bas et l'Allemagne, y figurent [illegible] tout à fait, contraire.

Le défaut connu des actuels documents de [illegible] à ce sujet, comme pour d'autres, ne pourra se [illegible] généralisée des récépissés d'exportations, [illegible] par les exportateurs selon le statut approprié, [illegible] pour l'Etat du Rio Grande do Sul depuis 1917, a été, en [illegible] incorporé aux procédés d'élaboration [illegible].

AMPLIFICATION DES CLASSES

Le tableau général des classes de dépouillement des marchandises qui, dès 1936, a présenté des additions sensibles par rapport à [illegible] notamment en ce qui concerne l'importation, a [illegible] au cours de 1937, afin de répondre à la [illegible] tion de produits, découlant des prédominances [illegible] observées dans les courants constitutifs du [illegible] du Brésil. Les chiffres ci-dessous mettent en évidence [illegible] des variations survenues, selon les grandes classes resp[illegible].

DÉVELOPPEMENT DANS LES CLASSES, DE 1934 a 1937

SPÉCIFICATION		Items constants 1934	Items constants 1937	Accroissements Total	Accroissements %
Importation	Classe I	[illegible]	[illegible]	[illegible]	13
	Classe II	[illegible]	[illegible]	164	124
	Classe III	37[illegible]	[illegible]	[illegible]	103
	Classe IV	[illegible]	[illegible]	[illegible]	[illegible]
Total		[illegible]	1 [illegible]	56[illegible]	97
Exportation	Classe I	[illegible]	[illegible]	[illegible]	18
	Classe II	[illegible]	[illegible]	7	11
	Classe III	[illegible]	[illegible]	[illegible]	1[illegible]
Total		[illegible]	[illegible]	48	13

Il faut [illegible] de la [illegible] pour la fabrication de la bière et le [illegible].

D'autre côté, le sel non destiné à usages alimentaires, c'est-à-dire, non raffiné, a été transposé de la Classe IV à la Classe II.

Une fois établi le critère de tenir en compte, autant que possible, la matière première prédominante dans les produits, on doit avoir en vue cette particularité. Ainsi, p. ex: les accessoires, qui non pas été joints à la machine à laquelle ils sont destinés, figurent dans le groupe de la matière première qui prédomine dans leur fabrication — c'est le fer, ils doivent être compris dans les groupes des manufactures de fer et ainsi de suite.

Un autre groupe, dont on doit faire un rapport spécial, est celui des Articles Divers (items 365 à 425 A) : tous les items qui y sont spécifiés, ont cessé de comprendre les données numériques concernant les textes-analyses, dont la matière prédominante, étant connue, a permis de les inclure dans les groupes respectifs, en généralisant ainsi le critère suscité.

Une observation attentive des nouvelles classes devient donc indispensable pour quiconque prétend effectuer des études comparatives avec des périodes antérieures. Il convient, pour cela, d'avoir toujours présents à l'esprit les références qui figurent à la presente publication pour les classes ouvertes en 1937 et au bulletin-résumé précédent pour les modifications antérieures.

Les alterations par amplification et par transfert, qui viennent d'être signalées, ayant fait sentir l'opportunité d'une révision et d'une redistribution générale des classes de marchandises spécifiées, le tableau encore en usage dans la présente publication a été complétement remanié, de sorte qu'il en vient, en 1938, à constituer un système de classification rigoureusement conforme au criterium de l'ordonnement décimal.

VALEUR INTERNATIONALE DE LA MONNAIE BRÉSILIENNE

La valeur de la monnaie brésilienne, par rapport à la livre sterling et la dollar américaine, présente dans cette publication un caractère tout spécial. C'est qu'elle ne renferme seulement ces petites variations qui découlaient naturellement de la pondération à laquelle elle était soumise, en consequence de la conversion en £ des montants mensuels: comme ceux-ci n'étaient pas constants, chaque mois, ils conduisaient à des moyennes annuelles de la monnaie brésilienne présentant des petits écarts, quand on la considérait à l'importation, à l'exportation ou au total du commerce extérieur, quoique la base de la conversion eût été la même pour les deux courants. La raison en est évidente: en resultant de la division des valeurs en milréis par leurs respectives équivalences en monnaie étrangère, la valeur calculée de la monnaie brésilienne subit de la diversité des taux de change, adoptés dans les conversions mensuelles des importations et des exportations, selon a été expliqué auparavant, en consequence des restrictions de change imposées, exclusivement aux exportations, à partir du 11 février 1935 (Voyez page VIII).

Le tableau ci-dessous contient, pour la période 1928 – 1937, les valeurs de la livre sterling, or et papier et de la dollar U. S. A. en correspondence aux discriminations y consignées et obtenues en divisant les chifres généraux en monnaie brésilienne de la page X par leurs respectives équivalences dans chacune des monnaies étrangères y indiquées.

Enfin, pour bien pouvoir apprécier ce tableau, il convient de fixer les circonstances aux quelles a été, pendant la période, soumis le marché de change au Brésil:

– 1931, octobre, jusqu'à 1934, août, contrôle complet de devises, avec des exceptions insensibles à partir du mois de mai de la dernière année;

– 1934, septembre, jusqu'à 1935, janvier, 60% des importations réglées au marché officiel du change et 40% au livre, retenant la Banque du Brésil 155 francs françaises par sac de café exporté;

– 1935, février, 11, libération du change pour les importations, à côté de la remise de 35% des lettres de change des exportations, avec des concessions postérieures de caractéres restreint;

– à partir de decembre, 1937, libération complète du marché des devises et établissement de taxes spéciales pour la constitution d'un fonds de change, modification qui, pour la courte période à laquelle elle s'est appliquée, n'en est pas arrivée à exercer d'influence sensible sur les données de la dernière année consignée dans ce bulletin.

MERCADORIAS

A

Classe

64 A - Aceleradores para vulcanização da borracha.
64 B - A[illegible] celulose
340 - Acético ácido

ÁCIDOS:

340 - Acético
340 C - Azótico
340 D - Bórico
352 C - Carbólico
349 A - Cítrico
340 B - Clorídrico
352 C - Fênico
340 F - Fórmico
340 B - Muriático
344 - Não especificados
344 B - » » para usos científicos e análises
340 C - Nítrico
346 E - Orgânicos não especificados
34[illegible] G - Oxálico
341 - Sulfúrico
343 - Tânico tarino
342 - Tartárico

193 - 195 D - AÇO E FERRO (MANUFATURAS DE)
41 - 45 E - » » » (MATÉRIAS PRIMAS DE)

473 - Açúcar
357 H - Açucares para indústria
257 C - Acumuladores elétricos e acessórios
157 A - Adereços de [illegible]
404 - » » galalite
37 - Adubos animais não especificados
37 B - » orgânicos de carne, osso, pelos e sangue pulverizados
345 - » químicos e sintéticos
53 - Aduélas de madeira
242 - Aeroplanos
425 - Agua mineral de mesa
346 - » » medicinal
353 H - » oxigenada para indústria
71 B - Águas-ras de origem mineral
71 - » » ou terebintina
173 - Agulhas de aço e ferro
203 C - » hipodermicas de aço e ferro
203 A - » » não especificadas
109 - Alabastro
343 - Alambiques
64 D - Albumina
344 B - Alcalis
346 F - Alcaloides
134 - Alcatifas de algodão
147 A - » » cânhamo
223 - » » juta
209 - » » lã
215 - » » linho
321 C - Alcatrão (emulsões e misturas de)
117 - » de origem vegetal
34 E - Alcoois para indústria
344 H - » » usos científicos
356 H - Alcoolatos
356 H - Alcoolaturas
486 - Alfafa
174 - Alfinetes de aço e ferro
163 - » » cobre

124 - 136 H - ALGODÃO (MANUFATURAS DE)
17 - 21 C - » (MATÉRIAS PRIMAS DE)

471 - Alhos
478 A - Alimentos preparados, não especificados, em latas

137 - ALUMÍNIO (MANUFATURAS DE)
75 - 75 A - » (MATÉRIAS PRIMAS DE)

70 D - Aluminio (sulfato de)
63 - Alvaiade de chumbo
64 H - » » origem mineral
64 - » » zinco e de titânio
104 B - Ambar
457 - Amêndoas
687 - » (óleos de)

320 - 327 - AMIANTO (MANUFATURAS DE)
99 - » (MATÉRIAS PRIMAS DE)

64 C - Amidos para indústria têxtil
66 E - » solúveis para indústria têxtil
347 B - Amônea (carbonato de)
34[illegible] G - » liquida
349 I - » (perclorato de)
345 G - » (sulfato de)
365 - Amostras
344 B - Anidridos não especif. para análises e usos científicos

221 - Aniagem de juta
6[illegible] - Anil
3[illegible] - Animais (despojos)
[illegible] - » vivos
[illegible] - Antimônio
[illegible] - » (óxido de)
3[illegible] - » (sulfato de)
2[illegible] H - Aparelhagem de laboratorios para serviços publicos
2[illegible] I - » refrigeração, aquecimento ou condicionamento de ar
279 - Apicultura (artigos para)
3[illegible] - Aplicações do papel
231 - Arados
2[illegible] - » (acessórios não especificados para)
2[illegible] - » (pontas de aço para)
177 - Aram de aço e ferro (exclusive farpado)
1[illegible] - » » cobre para uso não especificados
1[illegible] - » farpado de aço e ferro
42 B - Arcos de aço
44 B - » » ferro
[illegible] - » » madeira
99 A - Areias absorventes ou filtrantes
1[illegible] - » de moldar
2[illegible] G - Areometros
321 - Argila (canos e tubos de)
[illegible] - Argônio (gás)
142 - Armas brancas
141 - » de fogo
38 - Armamentos de caça e guerra
[illegible] A - Arquivos de aço
437 - Arroz
188 - Arruélas de aço e ferro
3[illegible] A - » » amianto
144 - » » borracha
1[illegible] D - » » cobre
71 A - » » cobre para construções e máquinas
331 - » » couro para máquinas
331 A - » » » » » de fiação
357 E - Arseniato de chumbo
76 - Arsenico
345 A - » branco
168 A - Artefatos de cobre para mesa, toucador e semelhantes
195 A - Artigos de aço e ferro para confecções e instalações, não especif.
184 D - » » » » » » escritório e colégio
